

## Our Vision

- BarAlgae's vision is to harness the wonders of microalgae for the benefits of human kind in areas of health and nutrition
- We strive to become a leading company in the global algae market by combining high-tech, cost-effective processes with biological knowhow in order to introduce novel species for premium products

## Our First Markets– Aquaculture Feed & Human Nutritional Supplements

- BarAlgae has selected various species according to their competitive advantages
- We grow species that can be used in multiple applications
- We constantly look for new species

## Core Competence

- Focused on customer needs – species and nutrient characteristics
- Innovation in algae cultivation
- Cost effective, Flexible, Taylor-made production
- High quality and pathogen free
- Consistent and adherent supply

BarAlgae specializes in commercial cultivation of various wild type microalgae species. The algae production facility was established in 2018, containing 30,000 meters of photo-bioreactor tubes, and will be up scaled to 100,000 meters in the near future. Our facility is capable of growing multiple species with diversified growth parameters. Designed up to 50 Tons/Year.
