

About seakura

At Seakura we believe it is possible and worthwhile to protect the health of both people and the planet and have therefore chosen to promote research and development in the field of seaweeds in Israel.

Seakura farm, residing at the Michmoret shore, we raise seaweeds on land, using unique, advanced ecological technology in an environment free of pollutants and pesticides and compliant with the strictest heavy metals standards.

Our seaweeds are rich in protein, minerals, chlorophyll, nutritional fibers, antioxidants and vitamins; bringing the health of the sea to people.
